## Teacher Answer Key

### Case Study

1. Rising costs and limited prescriptions pushed Rafael to try cheaper heroin, leading to class absences, theft, and eventual suspension.

2. He used medication-assisted therapy, counseling, and family support, ultimately helping him regain stability and return to sports.

### Multiple Choice

1. A

2. B

3. D

### Matching

1-C, 2-D, 3-A, 4-E, 5-B

### Fill-in-the-Blank

1) Withdrawal, 2) long-term, 3) prescription

### Short Answer (Sample Responses)

Q1: Teens are still developing physically and mentally, intensifying the discomfort and emotional distress.

Q2: They offer medical support to manage withdrawals and provide counseling for coping strategies.

Q3: Encourage them to speak to a trusted adult or counselor immediately and avoid enabling the behavior.
