Teacher Answer Key

Case Study

1. She initially wanted more energy to handle academic stress, but over time she became dependent and paranoid.

2. She dealt with physical withdrawal, mood swings, and the psychological challenges of quitting.

Multiple Choice

1. D

2. A

3. A

Matching

1-C, 2-E, 3-A, 4-B, 5-D

Matching note: the letters are shuffled for each worksheet, so use the key above rather than a fixed A to E order.

Fill-in-the-Blank

1) stimulant, 2) formication, 3) Withdrawal symptoms

Short Answer (Sample Responses)

Q1: The immediate euphoria can feel irresistible, leading them to chase that sensation repeatedly.

Q2: Meth disrupts brain chemistry, causing distorted perceptions and irrational fear.

Q3: Confiding in a trusted adult, seeking professional help, or joining a recovery program can be vital first steps.
