Teacher Answer Key

Case Study

1. The park uses zoning, with no-take zones and sustainable-use areas.

2. Climate change causes coral bleaching and ocean warming, which protections cannot fully prevent.

Multiple Choice

1. D

2. B

3. C

Matching

1-E, 2-D, 3-A, 4-C, 5-B

Fill-in-the-Blank

1) national parks, 2) Paris, 3) enforcement

Short Answer (Sample Responses)

Q1: Community-managed reserves are locally controlled, while international agreements involve multiple nations.

Q2: Without enforcement, illegal fishing and resource extraction undermine protections.

Q3: Education builds awareness and long-term cultural support for conservation.
