1-B, 2-D, 3-A, 4-E, 5-C

Fill-in-the-Blank

1) empathy, 2) hyperthermia, 3) unknown

Short Answer (Sample Responses)

Q1: Teens might see it as less dangerous due to its "party" reputation or colorful pills, but unregulated production and extreme strain on the body make it risky.

Q2: MDMA can mask fatigue signals, leading to continuous exertion and fluid loss, intensifying the risk of dehydration or heatstroke.

Q3: Seek immediate medical help, move them to a cooler area, and encourage small sips of water if they're conscious.
