Teacher Answer Key

Case Study

1. The Nile's floods deposited nutrient-rich silt, making the surrounding land highly fertile for cultivating crops.

2. Dams can alter the river's natural flow, impact downstream communities, and create political tensions over water rights.

Multiple Choice

1. B

2. C

3. D

Matching

1-C, 2-A, 3-D, 4-E, 5-B

Fill-in-the-Blank

1) Physical, 2) Place, 3) Human

Short Answer (Sample Responses)

Q1: Planners can place structures where they are less prone to flooding (physical geography) while ensuring efficient transportation and neighborhood design (human geography).

Q2: Space is the physical distance or location, while place includes the emotional, cultural, and historical meanings attributed to that location.

Q3: Local data shows immediate impacts, while global perspectives reveal larger patterns and connections, offering a well-rounded view of geographic issues.
